PROFESSIONAL SUMMARY

Information Technology graduate with a strong academic record, achieving multiple distinctions. Recognized for discipline, adaptability, and the ability to learn quickly. Experienced in working on practical projects such as portfolio websites, AI chatbots, and full-stack applications. Highly motivated to apply my technical knowledge and problem solving skills in an internship or a graduate programme to contribute to innovative and impactful technology solutions.

SKILLS

- **Programming Languages:** Python, Java, Javascript, HTML, CSS, PHP, PL/SQL, VB.NET
- **Frameworks:** Django, React.js, Rest APIs
- **Tools:** Git, Github, VS Code, Microsoft Office, MySQL, Azure, PowerBi, Tableau
- **Networking:** Packet Tracer, IP Addressing, Network Protocols, Wireless networking, Security Essentials, Advanced Configuration & Troubleshooting
- **Soft Skills:** Communication, Problem-Solving, Adaptability, Team Leadership, Interpersonal Skills

EDUCATION

Vaal University of Technology

Diploma in Information Technology | 2023 - 2025

- Software and Web development
- Networks
- Business analysis and project management
- Information Systems
- AI and ML

PROJECTS

My Portfolio Website: A personal portfolio showcasing my skills, projects, and background. It features a clean UI, responsive design, and contact functionality. The design focuses on clarity, professionalism, and smooth user experience across devices.

Tech stack: HTML, CSS, JS, SQLite, Python, Django

MediAI mental health chatbot: The Mental Health Chatbot is an AI-powered virtual assistant designed to provide users with emotional support, stress-relief guidance, and helpful coping strategies. It uses Natural Language Processing (NLP) to understand user concerns, offer empathetic responses, and connect individuals to relevant mental-health resources. While it does not replace professional therapy, it acts as a first-step support tool to help users manage anxiety, mood issues, or general wellness in a safe, accessible, and confidential way.

Tech stack: Python, Streamlit, SQLite

VUTEats: A campus focused food ordering web app designed to help VUT students browse menus, select meals, and place orders from the cafeteria with ease. This platform improves convenience by providing a simple interface to view available food options, add items to a cart, and track the ordering process for campus vendors.

Tech stack: HTML, CSS, JS, PHP, JSON

Music Player: A web based music player that integrates with the Deezer API to fetch real time music data such as tracks, artists, and album information. The app allows users to search for songs, play previews, and interact with a modern, responsive audio interface. This demonstrates my ability to consume external APIs, handle JavaScript, and build a functional media application.

Tech stack: HTML, CSS, JS, Fetch API, Python, Django

Weather Application: A simple weather web app that fetches real time weather data using an API. Users can search any city to view temperature, conditions, and icons.

Tech stack: HTML, CSS, JS, SQLite, Python, Django

CERTIFICATIONS

- **OCI Data Science Professional** – Oracle
- **OCI AI Foundations Associate** – Oracle
- **Fullstack Development** – IT Varsity
- **CCNA: Introductions to networking** – Cisco
- **CCNA: Switching, Routing, and Wireless Essentials** – Cisco
- **Use Generative AI for Software Development** – IBM
- **Artificial Intelligence Fundamentals** – IBM
- **Data Fundamentals** – IBM
